## Initial Notes

## Competitive Benchmark

Terminology  
around  
discounts  
should be  
clear

Text contrast  
should be  
WCAG  
compliant

Date  
selection in  
as few clicks  
as possible

Email signups  
should not be  
a distraction

A summary of  
date/location  
selection  
throughout UI  
is nice

Range sliders  
(price,  
distance) can  
be hard to use

Pricing tiers  
should be  
easy to  
understand

Checkout  
page should  
be as short  
as possible

Checkboxes  
should look  
like  
checkboxes

It's easy  
when search  
bar centrally  
located

Heart  
button for  
saving hotel  
is nice

Share  
button is  
helpful

Offers  
carousel  
before search  
= frustrating

Map views for  
spatial  
understanding

The default  
person count  
should be  
reasonable  
(one adult)

Forced  
login  
creates a  
barrier

Limit  
excessive  
info/clutter

## Participant 1

Reliability

Brand-  
recognition

Free  
cancellation

Value  
for  
money

Intro video of  
tropical fish =  
"holiday  
mood"

Date-  
selector  
should load  
quickly

Prices  
should be  
specific to  
locale

User always  
checks  
TripAdvisor  
reviews before  
booking

"Looks a  
nice hotel  
from the  
pictures"

Additional  
offers can  
be  
annoying

Location fine-  
tuning (ex:  
beachside) should  
be visible and  
obvious

## Participant 2

Loyalty membership feels like getting a deal

Search results should be geographical (not based on hotel name)

Iconography should be clear (people icon w/ two different heights implies adult + child)

Total number of reviews adds validity

Popups can be disorienting

Add-ons can be nice

Hotel copy should sell the hotel

"I do like to have a little look at the images of the hotel"

User didn't try clicking on unlabeled + button

Date-selector navigation should be clear

Clearly explain offers

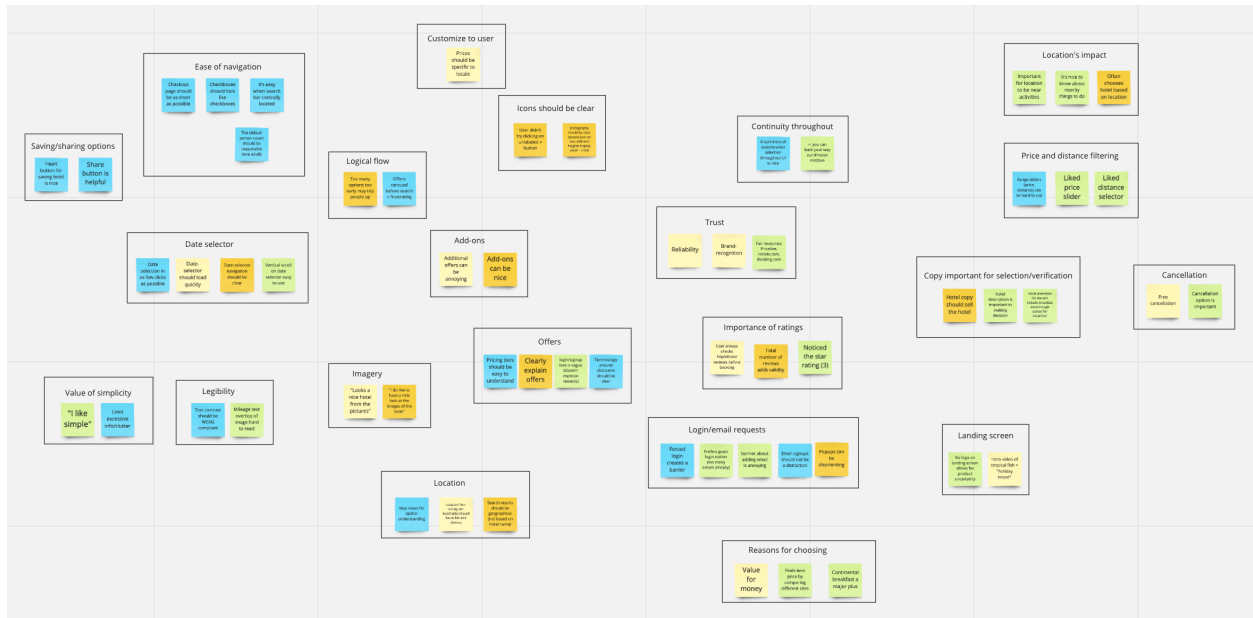

Too many options too early may trip people up

## Student User Test

## Initial Groupings

Completed
